GIS Viewer on Amanda 7

Presenter: Subir Mukherjee

CSDC

GIS Viewer integration within Amanda 7 includes

A.
- – Search for property using Filter tool on GIS Viewer. Then show related Amanda data
- – Using Rectangle tool on GIS Viewer, mark/display related Amanda data
- – Create a new folder starting from the GIS Viewer.

B.
- – Search for Folders using keyword and display results on GIS Viewer.

C.
- – Perform Advanced Search on Permits + display associated property on thumbnail view of GIS Viewer within Folder tab.

D.
- – Display Processes on GIS Viewer from Tasklist.

E.
- – Search and retrieve Properties. Display the same on Google Map.

CSDC

Display Amanda Folders in GIS Viewer at a Property

- Starting from within a GIS Viewer, use the Filter and retrieve Folders at properties and display on GIS Viewer.

- Highlight properties using Rectangle. Display associated Amanda Folders at highlighted properties.

- Starting in GIS Viewer, create new Amanda Folder.

Keyword based search and display Properties @Amanda Folders in GIS Viewer

- Starting from Permit search, search folders by keyword.

- Display resultset as pushpins on GIS Viewer.

- Click "Folder" link on pop up, to return to resultset in Amanda.

CSDC

Thumbnail view of Property in Folder tab

- Starting from Advanced Permit search, search folders by say date range.

- Display resultset. Go to FolderDetail and show FolderProperty as pushpin on thumbnail view of GIS viewer

CSDC

Show Processes on Folders on GIS Viewer

- Starting from Task List, select row(s) and choose GIS.

- Processes on Folders are displayed as pushpins on GIS Viewer
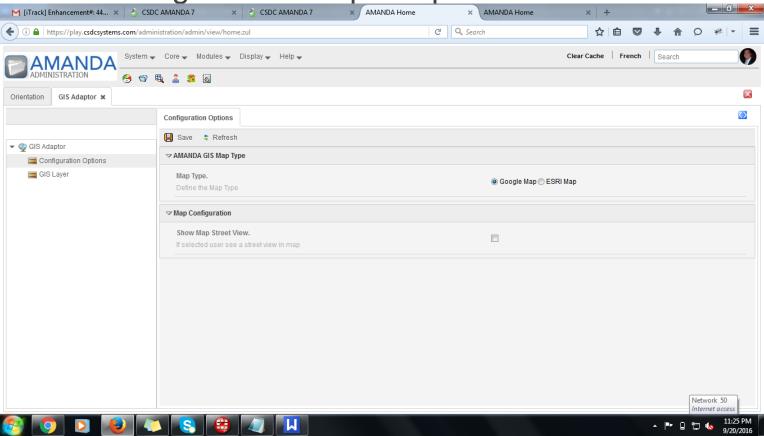

CSDC

Show search results on Google Map

- Search for a Property and show pushpin on Google Map.

- Show Admin setting which sets either ArcGis map or the Google Map.

  Note: Google Map will only show the property as push pin. It will not be a rich ArcGIS Viewer that is interactive with Amanda

Admin setting for Google Map

- Admin setting @GIS Adaptor option in Admin
