My Office- Widgets

CSDC

What is My Office?

- A tool to organize personalized components for easy access to AMANDA functions that are relevant to each user

- It is user-friendly interface to navigate through and query for information

- It has two components
  - Widgets
  - Apps

CSDC

What is Widget?

- Widgets are the applications that are easy ways to automate specific business functions.

- Widget emulates the function of customizable Web 2.0 sites

- Like Web 2.0, widgets are mini applications, which are fine tuned for a specific purpose

Widgets- Overview

- Functionality at fingertips

  – Capabilities of an application crossed with accessibility of an icon

- Personalized user experience

  –customized arrangement

- Self-contained architecture

  – If a widget breaks, others will not be effected

CSDC

Widgets- Organization

- Users can subscribe to different Widgets.

- Administrators can grant access to Widgets and organize them in groups

- The user can drag and drop to reorder the appearance of Widgets in the desired location.

CSDC
